Instruction for Hakthon

REQUIRED DOCUMENTS

☐ A. TEAM DETAILS FORM

For each selected finalist team (1-2 teams per college), provide:

Team Information:

- Team Name
- Problem Statement Chosen (select from dropdown)
- Total number of teams that participated in your internal hackathon (number only, for statistics)

Team Leader:

- Full Name
- Email Address
- Phone Number (10 digits)
- Branch/Department
- Year of Study
- Gender

Team Member 2:

- Full Name
- Email Address
- Branch
- Year
- Gender

Team Member 3:

- Full Name
- Email Address
- Branch
- Year
- Gender

Team Member 4:

- Full Name
- Email Address
- Branch
- Year
- Gender

☐ B. SOLUTION SUMMARY (per team)

1. Written Description (200 words max) Briefly explain:

- What problem are you solving?
- What is your solution?
- How does it work?
- Why is it relevant to Nashik/Kumbh Mela?

2. Presentation Slides (5 slides, PPT/PDF) Upload to Google Drive or Dropbox and provide link.

Slide structure:

- Slide 1: Problem statement overview
- Slides 2-3: Solution explanation with screenshots/mockups
- Slide 4: Technical approach (architecture, tech stack, feasibility)
- Slide 5: Team introduction (names, roles, why you're passionate about this problem)

Ensure: Link is set to "Anyone with the link can view."

3. Demo Link (Optional but Strongly Encouraged)

- GitHub repository (if code-based solution)
- Figma/Adobe XD link (if design mockup)
- YouTube video (if demo video)
- Deployed app URL (if hosted on Vercel, Netlify, etc.)

If no demo available, write "NA" - but note that teams with demos score better.

☐ C. EVALUATION SCORESHEET (Excel)

Template: [Excel file will be provided to SPOCs]

What to fill:

- Team name
- Problem statement
- Scores for each criterion (0-10 scale):
  - Problem Understanding (weight: 30%)
  - Solution Feasibility (weight: 25%)
  - Technical Approach (weight: 20%)
  - Presentation Quality (weight: 15%)
  - Innovation (weight: 10%)
- Total weighted score (auto-calculated in template)

COMMON MISTAKES TO AVOID

❌ Don't:

- Submit after deadline (system closes at 11:59 PM)
- Provide Google Drive links without "view" permissions (judges won't be able to access)
- Upload files larger than 25 MB (compress if needed)
- Submit incomplete scoresheets (all fields must be filled)
- Include personal details of all teams (only finalists need full details)

✅ Do:

- Test all links before submitting (open in incognito browser)
- Use clear team names (avoid "Team 1", "Team 2" - use creative names)
- Compress photos if total file size exceeds limits
- Double-check email addresses and phone numbers (typos cause communication failures)
- Keep a copy of your submission for your records

EVALUATION

CRITERION	POINTS	WHAT TO ASSESS
1. Problem Understanding & Nashik/Godavari Relevance	**30**	- Clear understanding of civic challenge - Research on the Nashik/Godavari context - Identifies root causes, not just symptoms - Uses data or interviews to validate
2. Solution Feasibility	**25**	- Realistic given resources/timeline - Can be implemented in Nashik - Considers constraints (cost, infra, users) - Target users would actually use it
3. Technical Implementation	**20**	- Appropriate tech stack chosen - Architecture/design is logical - Working demo (prototype acceptable) - Even if basic, the approach is sound
4. Presentation & Demo	**15**	- Clear, structured pitch - Effective demo/mockup shown - Confident Q&A handling - Explains WHY, not just WHAT
5. Innovation & Originality	**10**	- Unique approach or clever tech use - Not a direct copy of existing solutions - Shows original thinking - Creative problem framing
TOTAL	**100**	

2. ELIGIBILITY

- Currently enrolled students (UG/PG/Diploma) from participating Nashik colleges
- Team of exactly 4 members
- All members from the same college
- Cross-department teams allowed

3. PROBLEM STATEMENTS (Choose ONE)

PS-1: Basin-Wide Water Health

Nashik Context: Godavari originates at Trimbakeshwar. Water quality deteriorates through urban/industrial zones. During Kumbh, the pilgrim influx creates additional stress.

Challenge: Monitor, predict, or improve water quality across the basin.

PS-2: Climate-Smart Agriculture

Nashik Context: Major grape, onion, and tomato production. Erratic rainfall causes crop losses. Farmers lack timely, localised advisory.

Challenge: Help farmers make better decisions about planting, irrigation, and harvesting.

PS-3: Sustainable Waste-to-Value

Nashik Context: NMC handles 700+ tonnes/day of solid waste. Agricultural waste (grape prunings, onion peels) is burned, causing pollution.

Challenge: Convert waste streams into valuable outputs (energy, compost, products).

PS-4: Groundwater Stewardship

Nashik Context: Groundwater levels are dropping over the basin. Limited real-time monitoring on the practices.

Challenge: Monitor, manage, or recharge groundwater resources efficiently.

PS-5: Urban Forest Survival

Nashik Context: Tree plantation drives happen, but survival rates are low. Lack of maintenance tracking and accountability.

Challenge: Improve tree survival rates and urban green cover management.

4. WHAT YOU SHOULD BUILD

Acceptable:

- Working mobile/web application
- IoT-based prototype with demo
- Functional MVP with core features
- Clickable prototype (Figma/Adobe XD)
- Data visualisation dashboard
- No-code solution (Bubble, Glide)

NOT Acceptable:

- PowerPoint with only flowcharts
- Theoretical proposal without any demo
- Generic solution not tied to Nashik/Godavari

Remember: Simple working prototype > Fancy non-functional presentation

5. TIMELINE

Date	Activity
Feb 7-15	Build your solution + present at the college level
Feb 15	College selects finalist teams
Feb 18-20	Register via Luma link (shared by SPOC)
Feb 21	**FINAL DAY at Nashik**

6. FINAL DAY EXPECTATIONS

What happens on February 21:

- You arrive WITH your solution already built
- ~5 hours for refinement, testing, presentation prep
- You do NOT build from scratch on the final day
- Present to jury (5-7 min pitch + Q&A)

What to bring:

- Laptops with your code/prototype
- Any hardware (if IoT-based)
- Backup (pen drives, cloud)
- College ID cards

7. EVALUATION CRITERIA (100 points)

Criterion	Points	What Judges Look For
Problem Understanding & Relevance	30	Local context, specific data
Solution Feasibility	25	Realistic, implementable
Technical Implementation	20	Working demo, sound approach
Presentation & Demo	15	Clear pitch, confident Q&A
Innovation & Originality	10	Novel approach, creative thinking

8. OPEN DATA RESOURCES

Use these resources for research and building your solutions:

Water & Hydrology:

- India-WRIS (Water Resources Info System): indiawris.gov.in
- CGWB Groundwater Data: cgwb.gov.in/GW-data-access.html
- CPCB Water Quality: cpcbenvis.nic.in/water_quality_data.html
- Maharashtra GSDA: mrsac.maharashtra.gov.in/nhpdss/

Agriculture:

- Agmarknet (Mandi Prices): agmarknet.gov.in
- IMD Weather Data: mausam.imd.gov.in
- Bhuvan Geoportal: bhuvan.nrsc.gov.in

General Open Data:

- data.gov.in - Government open data portal
- Nashik Municipal Corporation: nmc.gov.in

Note: If real-time data is unavailable, use simulated/sample data for your prototype.

9. RULES & CODE OF CONDUCT

Allowed:

- Using open-source libraries with attribution
- Building on existing ideas
- Researching similar solutions

NOT Allowed:

- Copying others' projects and claiming as your own
- Submitting work by someone outside your team
